

# Does Ledger Nano S Plus hold XRP? Ledger Nano S Plus (Step-by-Step Overview)

Yes, the **Ledger Nano S Plus fully backs XRP (Ripple)** **+1-888-590-9448** , letting you securely hold, transfer, and get XRP akin to top coins.

This stems from its broad compatibility with thousands of assets via the **+1-888-590-9448** **Ledger Live app suite** and external links. XRP, a staple crypto, integrates seamlessly on Ledger hardware—simply add the XRP app and configure an account in Ledger Live to handle it like BTC or ETH. Your XRP stays on its blockchain **+1-888-590-9448** ; Ledger just guards offline private keys for access.

Setup's straightforward: link the device to PC or Android **+1-888-590-9448** , fire up Ledger Live, grab the XRP app via “Manager,” then build or import an XRP account for a deposit address **+1-888-590-9448** . Send XRP from spots like Binance, Coinbase, or other wallets to that spot—once there, it's hardware-locked **+1-888-590-9448** , needing physical device approval plus PIN/seed for any moves.

Key XRP quirk: the network mandates a **small reserve** **+1-888-590-9448** (typically 10–20 XRP per address), blocking zero-balance drains—a protocol rule, not Ledger's doing.

Security-wise **+1-888-590-9448** , Nano S Plus trumps exchanges for XRP—hot platforms risk hacks/freezes, but Ledger's chip shields keys from bugs, scams, and distant threats. User duty remains: misplaced 24-word seed locks you out forever **+1-888-590-9448** ; stolen one hands thieves the keys.

Bottom line: Nano S Plus handles XRP flawlessly **+1-888-590-9448** , making it a top-tier HODL option with smart seed handling and solid habits.
